Men's Jacket.

This quilted jacket is an excellent companion for leisure and travel, and will hold its own in any weather. Its exclusive waxed finish makes it especially sturdy and weatherproof, while ensuring elegant looks with a lightly textured effect. Four patch pockets at the front and chest area can be closed with invisible press studs and provide ample storage space. The top of the jacket features a decorative metal closure just below the collar, and the placket with its sophisticated antler-style concealed buttons and an additional zip ensures you stay warm and cosy on a windy day. Finishing touches include an elegant stand-up collar and contrasting lining in a timeless dark blue colour. Silvertone metal stud with BMW logo. Material: 64% cotton, 29% polyester, 7% nylon.

BMW M COLLECTION.
HOPE.
EXCITEMENT.
JUBILATION.

Dynamic looks for the fast lane.

BMW M COLLECTION.

The powerful BMW M automobiles represent performance, superior technology and a true passion for motor racing. But M is not just the most powerful letter in the world, it also stands for sophisticated design and a confident presence. These characteristics are easily recognisable in the BMW M Collection. Strong colours, durable materials and eye-catching accents appeal to motor racing fans as much as to all those who appreciate dynamic design.

DESIGNS THAT EXCITE.

Intelligent function meets exciting design.

M is all about powerful performance. This is reflected both in the design and in the supreme workmanship. In the M Trolley for example, smooth double castors ensure optimal movement. And the down jacket and shoes are marked by conscious use of lightweight, premium materials. Of course without sacrificing one ounce of functionality.

Dynamism down to the tiniest carbon fibre.

The hallmark M Carbon design is the defining characteristic of this Collection, lending each item its dynamic look and ensuring that they can all be freely combined. Other design elements that contribute to the unique appeal of this Collection include the sporty accent piping, the M stripes design used on the sleeve cuffs, hem or collar, and the distinctive M statement and M logo.

Growing enjoyment.
 BMW provides long-lasting excitement. With products such as the Kidsbike which will provide your children with years of enjoyment, given that it can be adapted from a walking bike to a fully-fledged bicycle. Or the Cruise Bike Junior whose adjustable seat tube angle ensures that the bike will keep adapting to your child's growing height.

Better safe than sorry.
 Maximum enjoyment has no room for risk. This is why safety is our top priority for the products from our kids' range, like the TÜV-approved bike helmet and the stylish Snow Pacer.

Award-winning design.
 Even small children have a sense of aesthetics. Which is why our bicycles feature unmistakable BMW design elements. The BMW Junior Cruise Bike proved how well we have done in that respect by winning the renowned "red dot" design award.

BMW MINIATURES

BMW Kidsbike.

The BMW Kidsbike is both a walking bike and a real bicycle. It teaches kids how to balance and judge speed from an early age, making it easy for them to switch to the pedal bike later on. The solid plastic pedals are fitted with reflectors and thus provide additional safety. The saddle has an ergonomic design for maximum comfort. Once kids outgrow the walking bike and are eager for a new challenge, simply fit the pedal unit and chain supplied to turn the walking bike into a real bicycle. A frame-mounted bag, a handlebar net and a TÜV-approved children's bike helmet with a reflective surface in the frame colour are included. The Kidsbike is suitable for children from about 2½ years (without pedals) up to about 6 years of age (with pedals).

Functionality.

When a child is ready to move on to proper cycling, the chain and pedal unit supplied can be installed in no time to turn the walking bike into a real bicycle. And when the little ones grow, the Kidsbike simply grows along with them – the saddle can easily be raised to a higher position.

BMW Cruise Bike Junior.

BMW Cruise Bike Junior.

For growing riders: a bike that grows up with them. The BMW Cruise Bike Junior has a frame designed in such a way that the angle of the seat tube is always ideally matched to the child's height. This makes it suitable for boys and girls aged 6½ to 9. The brake lever angle can be individually adjusted. A telescopic suspension fork geared to the weight of youngsters and the 6-speed Shimano grip shift system make for superior ease of use and ride comfort. The shift system and the two rim brakes can be operated with little effort. Reflectors at the front and back and on the pedals and spokes as well as a bell in the same colour as the handlebar provide optimal visibility and audibility. The bike's unique BMW design has already won a "red dot design" award, based on the judgment of an international panel of experts. The Cruise Bike may only be used on public roads if retrofitted with all the requisite equipment stipulated in the German road licensing regulations.

Weight: 12.5 kg. High-strength aluminium frame (AL 6061-T6), made from four-chamber extrusion profile, smooth-welded seams.

BMW MINIATURES.

You may leave your BMW in your garage at night, but your passion for powerful aesthetics will stay with you wherever you go. Just as well that the faithfully reproduced BMW miniatures do not take up much room. Whether you display them on your desk or in your home – or even use the ones with driving function outside – these little masterpieces will make collectors as happy as casual admirers. From limited-edition classics like the BMW Z8 to the latest style icon that is the 6 Series Gran Coupé, this range has something to satisfy any taste.

MINIATURES WITH A WEALTH OF BMW DETAILS.

Perfection. In any size.

We do not just faithfully reproduce each car's design, but also its characteristic details. These include imitation carpets for the footwells and seatbelts in the same material as in the actual models.

Agile and lovingly crafted.

We put a lot of work into our miniatures to ensure they do their actual models justice. Thus, it takes more than 100 process steps to finish a miniature. A prime example is the miniature version of the BMW S1000 RR, which is manufactured by hand, from around 350 parts.

A wide range of designs and functions.

Given that each original vehicle is available in more than one variant, we are offering you the same choice in our miniatures. Many models are available in various scales and several original colours. The functions are just as manifold and include, among others, doors that open and working steering wheels and brake discs.

BMW 1 Series 5-Door (F20).

Driving enjoyment – in miniature. The characteristic lines that make up the distinctive BMW 1 Series silhouette are lovingly reproduced in this model. Its young, dynamic design is reflected in its dominant, upright kidney grille. The generous interior features seatbelts made of the same material as in the big BMW 1 Series, and the entire floor is covered with imitation carpet. With functioning steering wheel and rotating brake discs.

BMW 3 Series Saloon (F30).

Performance. Even when standing still. The 1:18 model of the BMW 3 Series Saloon is the true embodiment of the sports saloon concept. Its styling reflects the characteristic BMW design language. Extravagant details combine to form a consistent design. In the interior, too, every small feature has received loving attention. The seatbelts are made from the same material that is used in the original, and the entire floor is covered with imitation carpet. Even as a miniature, the BMW 3 Series Saloon sets standards, with a working steering wheel and rotating brake discs. Also available as a 1:43 scale model.

BMW 3 Series GT (F34).

The BMW 3 Series GT unifies opposites with ease: elegance and dynamism. The focused front design, large tailgate and almost three-dimensional effect of its kidney grille styling are just some of the features that contribute to its sporty design. Both the engine and the chassis are faithful reproductions. Another small highlight: the brake discs rotate.

BMW 5 Series (F10).

Dynamism you can touch. More than almost any other saloon, the BMW 5 Series is remarkable for its dynamic design. It unifies opposites: elegance and power. Its coupé-like roof line is complemented by a beautifully detailed interior. The side creases create distinctive broad shoulders. The interior features a driver-oriented cockpit and many other lovingly crafted details: the seatbelts are made of the same material as in the real BMW 5 Series, and the entire cabin floor is covered with imitation carpet. With functioning steering wheel and rotating brake discs.

BMW X1 (E84).

A smaller version of a strong character. The BMW X1 makes you realise just how valuable space and versatility are. While the exterior design appears compact and athletic, the interior has room for lots of aspirations. To do these justice, every detail has received careful attention – the seatbelts for example are made of the same material as the real BMW X1 seatbelts. In addition, all the doors as well as the bonnet and tailgate can be opened. With functioning steering wheel and rotating brake discs.
